Contents

Volume 31 Number 1 **January 1998**

E. T. Hsiao and S. N. Robinovitch — 1 — **Common protective movements govern unexpected falls from standing height**

M. Siouffi, V. Deplano and R. Pélissier — 11 — **Experimental analysis of unsteady flows through a stenosis**

F. T. Sheehan, F. E. Zajac and J. E. Drace — 21 — **Using cine phase contrast magnetic resonance imaging to non-invasively study *in vivo* knee dynamics**

E. J. Sprigings, J. L. Lanovaz, L. G. Watson and K. W. Russell — 27 — **Removing swing from a handstand on rings using a properly timed backward giant circle: a stimulation solution**

E. M. Hasler and W. Herzog — 37 — **Quantification of *in vivo* patellofemoral contact forces before and after ACL transection**

S. Fabregues, K. Baijens, R. Rieu and P. Bergeron — 45 — **Hemodynamics of endovascular prostheses**

T. McCormack and J. M. Mansour — 55 — **Reduction in tensile strength of cartilage precedes surface damage under repeated compressive loading *in vitro***

T.-W. Lu, J. J. O'Connor, S. J. G. Taylor and P. S. Walker — 63 — **Validation of a lower limb model with *in vivo* femoral forces telemetered from two subjects**

Technical Notes

L.-Q. Zhang, G. Nuber, J. Butler, M. Bowen and W. Z. Rymer — 71 — ***In vivo* human knee joint dynamic properties as functions of muscle contraction and joint position**

T. M. Kepple, H. J. Sommer III, K. Lohmann Siegel and S. J. Stanhope — 77 — **A three-dimensional musculoskeletal database for the lower extremities**

C. R. Roberts, J. K. Rains, P. D. Paré, D. C. Walker, B. Wiggs and J. L. Bert — 81 — **Ultrastructure and tensile properties of human tracheal cartilage**

G. Giakas, V. Baltzopoulos and R. M. Bartlett — 87 — **Improved extrapolation techniques in recursive digital filtering: a comparison of least squares and prediction**

C. G. M. Meskers, F. C. T. van der Helm, L. A. Rozendaal and P. M. Rozing — 93 — ***In vivo* estimation of the glenohumeral joint rotation center from scapular bony landmarks by linear regression**

J. J. Crisco and R. D. McGovern — 97 — **Efficient calculation of mass moments of inertia for segmented homogenous three-dimensional objects**

Letters to the Editor

S. C. Cowin, Y. P. Arramon, G. M. Luo and A. M. Sadegh — 103 — **Remarks on the Technical Note entitled "Temporal stability of node-based internal bone adaptation simulations"**

M. E. Levenston — 105 **Author's response to comments by Cowin et al. regarding Levenston (1997)**

I **Announcements**

Volume 31 Number 2 **February 1998**

T. A. L. Wren, G. S. Beaupré and D. R. Carter — 107 **A model for loading-dependent growth, development, and adaptation of tendons and ligaments**

I. Vesely — 115 **The role of elastin in aortic valve mechanics**

J. H. Keyak, S. A. Rossi, K. A. Jones and H. B. Skinner — 125 **Prediction of femoral fracture load using automated finite element modeling**

R. Z. Wang and S. Weiner — 135 **Strain–structure relations in human teeth using Moiré fringes**

S. Kitazaki and M. J. Griffin — 143 **Resonance behaviour of the seated human body and effects of posture**

A. Iglič, H. Hägerstrand, V. Kralj-Iglič and M. Bobrowska-Hägerstrand — 151 **A possible physical mechanism of red blood cell vesiculation obtained by incubation at high pH**

Technical Notes

R. E. Hughes, G. Niebur, J. Liu and K.-N. An — 157 **Comparison of two methods for computing abduction moment arms of the rotator cuff**

V. M. Zatsiorsky and D. L. King — 161 **An algorithm for determining gravity line location from posturographic recordings**

J. Z. Wu, W. Herzog and M. Epstein — 165 **Evaluation of the finite element software ABAQUS for biomechanical modelling of biphasic tissues**

M. D. Buschmann, J. Soulhat, A. Shirazi-Adl, J. S. Jurvelin and E. B. Hunziker — 171 **Confined compression of articular cartilage: linearity in ramp and sinusoidal tests and the importance of interdigitation and incomplete confinement**

J. A. Moore, D. A. Steinman and C. R. Ethier — 179 **Computational blood flow modelling: errors associated with reconstructing finite element models from magnetic resonance images**

R. D. Komistek, J. B. Stiehl, D. A. Dennis, R. D. Paxson and R. W. Soutas-Little — 185 **Mathematical model of the lower extremity joint reaction forces using Kane's method of dynamics**

Letters to the Editors

V. M. Zatsiorsky — 191 **Can total work be computed as a sum of the 'external' and 'internal' work?**

H. Thys, P. A. Willems and P. Saels — 193 **Authors' response**

G. J. van Ingen Schenau — 195 **Positive work and its efficiency are at their dead-end: comments on a recent discussion**

199 **Erratum**

I **Announcements**

Volume 31 Number 3 **March 1998**

G. N. Duda, K. Eckert-Hübner, R. Sokiranski, A. Kreutner, R. Miller and L. Claes	201	**Analysis of inter-fragmentary movement as a function of musculoskeletal loading conditions in sheep**
S. S. Chen and J. D. Humphrey	211	**Heat-induced changes in the mechanics of a collagenous tissue: pseudoelastic behavior at 37 C**
K. Perktold, M. Hofer, G. Rappitsch, M. Loew, B. D. Kuban and M. H. Friedman	217	**Validated computation of physiologic flow in a realistic coronary artery branch**
P. D. Ballyk, C. Walsh, J. Butany and M. Ojha	229	**Compliance mismatch may promote graft–artery intimal hyperplasia by altering suture-line stresses**
R. R. Neptune and A. J. van den Bogert	239	**Standard mechanical energy analyses do not correlate with muscle work in cycling**
G. N. Duda, H. Kirchner, H.-J. Wilke and L. Claes	247	**A method to determine the 3-D stiffness of fracture fixation devices and its application to predict inter-fragmentary movement**
E. M. Hasler, W. Herzog, T. R. Leonard, A. Stano and H. Nguyen	253	***In vivo* knee joint loading and kinematics before and after ACL transection in an animal model**
B. J. Munro, J. R. Steele, G. M. Bashford, M. Ryan and N. Britten	263	**A kinematic and kinetic analysis of the sit-to-stand transfer using an ejector chair: implications for elderly rheumatoid arthritic patients**
M. H. Friedman and Z. Ding	273	**Relation between the structural asymmetry of coronary branch vessels and the angle at their origin**
Technical Notes		
S. K. Boyd and J. L. Ronsky	279	**Instantaneous moment arm determination of the cat knee**
D. B. Burr, C. H. Turner, P. Naick, M. R. Forwood and R. Pidaparti	285	**En bloc staining of bone under load does not improve dye diffusion into microcracks**
A. Cappello, M. Viceconti, F. Nanni and G. Catania	289	**Global asymptotic stability of bone remodeling theories: a new approach based on non-linear dynamical systems analysis**
	I	**Announcements**

Volume 31 Number 4 **April 1998**

J. T. Dennerlein, E. Diao, C. D. Mote, Jr. and D. M. Rempel	295	**Tensions of the flexor digitorum superficialis are higher than a current model predicts**
M. Taylor, K. E. Tanner and M. A. R Freeman	303	**Finite element analysis of the implanted proximal tibia: a relationship between the initial cancellous bone stresses and implant migration**

T. Muellner, R. Reihsner, L. Mrkonjic, W. Kaltenbrunner, O. Kwasny, R. Schabus, M. Mittlboeck and V. Vécsei — 311 **Twisting of patellar tendon grafts does not reduce their mechanical properties**

R. Lundström, P. Holmlund and L. Lindberg — 317 **Absorption of energy during vertical whole-body vibration exposure**

A. L. Lerner, J. L. Kuhn and S. J. Hollister — 327 **Are regional variations in bone growth related to mechanical stress and strain parameters?**

D. B. Burr, C. H. Turner, P. Naick, M. R. Forwood, W. Ambrosius, M. S. Hasan and R. Pidaparti — 337 **Does microdamage accumulation affect the mechanical properties of bone?**

W. Wang and K. H. Parker — 347 **Movement of spherical particles in capillaries using a boundary singularity method**

J. A. Miller and M. M. Gross — 355 **Locomotor advantages of Neandertal skeletal morphology at the knee and ankle**

R. J. A. Bigsby, D. D. Auger, Z. M. Jin, D. Dowson, C. S. Hardaker and J. Fisher — 363 **A comparative tribological study of the wear of composite cushion cups in a physiological hip joint simulator**

Technical Notes

S. Kumaresan, N. Yoganandan and F. A. Pintar — 371 **Finite element modeling approaches of human cervical spine facet joint capsule**

P. E. Pidcoe and M. W. Rogers — 377 **A closed-loop stepper motor waist-pull system for inducing protective stepping in humans**

B. Couteau, M.-C. Hobatho, R. Darmana, J.-C. Brignola and J.-Y. Arlaud — 383 **Finite element modelling of the vibrational behaviour of the human femur using CT-based individualized geometrical and material properties**

T. D. Zavras and A. A. Amis — 387 **Method for visualising and measuring the position of the femoral attachment of the ACL and ACL grafts in experimental work**

M. L. McMulkin, J. C. Woldstad and R. E. Hughes — 391 **Torso loading via a harness method activates trunk muscles less than a hand loading method**

M. J. Voor and C. Khalily — 397 **Halo pin loosening: a biomechanical comparison of experimental and conventional designs**

Volume 31 Number 5 **May 1998**

W. J. Vankan, J. M. Huyghe, C. C. van Donkelaar, M. R. Drost, J. D. Janssen and A. Huson — 401 **Mechanical blood-tissue interaction in contracting muscles: a model study**

W. L. Lim, Y. T. Chew, T. C. Chew and H. T. Low — 411 **Steady flow dynamics of prosthetic aortic heart valves: a comparative evaluation with PIV techniques**

D. E. Hurwitz, D. R. Sumner, T. P. Andriacchi and D. A. Sugar — 423 **Dynamic knee loads during gait predict proximal tibial bone distribution**

S. M. Kurtz, J. A. Ochoa, C. V. White, S. Srivastav and J. Cournoyer — 431 **Backside nonconformity and locking restraints affect liner/shell load transfer mechanisms and relative motion in modular acetabular components for total hip replacement**

K. Gruber, H. Ruder, J. Denoth and K. Schneider — 439 **A comparative study of impact dynamics: wobbling mass model versus rigid body models**

N. M. Bachrach, Van C. Mow and F. Guilak — 445 **Incompressibility of the solid matrix of articular cartilage under high hydrostatic pressures**

M. Krafczyk, M. Cerrolaza, M. Schulz and E. Rank — 453 **Analysis of 3D transient blood flow passing through an artificial aortic valve by Lattice–Boltzmann methods**

A. E. Minetti — 463 **A model equation for the prediction of mechanical internal work of terrestrial locomotion**

R. V. Baratta, B.-H. Zhou, M. Solomonow and R. D. D'Ambrosia — 469 **Force feedback control of motor unit recruitment in isometric muscle**

Technical Notes

M. F. Gross and M. H. Friedman — 479 **Dynamics of coronary artery curvature obtained from biplane cineangiograms**

M. O. Jansen, H. C. Schamhardt, A. J. van den Bogert and W. Hartman — 485 **Mechanical properties of the tendinous equine interosseus muscle are affected by *in vivo* transducer implantation**

H. A. Vrooman, E. R. Valstar, G.-J. Brand, D. R. Admiraal, P. M. Rozing and J. H. C. Reiber — 491 **Fast and accurate automated measurements in digitized stereophotogrammetric radiographs**

T. J. Koh and W. Herzog — 499 **Eccentric training does not increase sarcomere number in rabbit dorsiflexor muscles**

Volume 31 Number 6 **June 1998**

M. Rostedt, L. Ekström, H. Broman and T. Hansson — 503 **Axial stiffness of human lumbar motion segments, force dependence**

E. Suter, W. Herzog, T. R. Leonard and H. Nguyen — 511 **One-year changes in hind limb kinematics, ground reaction forces and knee stability in an experimental model of osteoarthritis**

B. D. Beynnon and B. C. Fleming — 519 **Anterior cruciate ligament strain in-vivo: A review of previous work**

I. Kingma, J. H. van Dieën, M. de Looze, H. M. Toussaint, P. Dolan and C. T. M. Baten 527 **Asymmetric low back loading in asymmetric lifting movements is not prevented by pelvic twist**

J. C. Iatridis, L. A. Setton, R. J. Foster, B. A. Rawlins, M. Weidenbaum and Van C. Mow 535 **Degeneration affects the anisotropic and nonlinear behaviors of human anulus fibrosus in compression**

T. Uchiyama, T. Bessho and K. Akazawa 545 **Static torque–angle relation of human elbow joint estimated with artificial neural network technique**

K. Meijer, H. J. Grootenboer, H. F. J. M. Koopman , B. J. J. J. van der Linden and P. A. Huijing 555 **A Hill type model of rat medial gastrocnemius muscle that accounts for shortening history effects**

Technical Notes

W. P. Smutz, A. Kongsayreepong, R. E. Hughes, G. Niebur, W. P. Cooney and K.-N. An 565 **Mechanical advantage of the thumb muscles**

T. L. Haut, M. L. Hull and S. M. Howell 571 **A high-accuracy three-dimensional coordinate digitizing system for reconstructing the geometry of diarthrodial joints**

Volume 31 Number 7 **July 1998**

M. E. Levenston and D. R. Carter 579 **An energy dissipation-based model for damage stimulated bone adaptation**

D. Taylor 587 **Microcrack growth parameters for compact bone deduced from stiffness variations**

T. J. Koh and W. Herzog 593 **Increasing the moment arm of the tibialis anterior induces structural and functional adaptation: implications for tendon transfer**

D. L. Kopperdahl and T. M. Keaveny 601 **Yield strain behavior of trabecular bone**
